Hexchex Multi Size Wheel Nut Indicator

HEXCHEX® MULTI-SIZE LOOSE WHEEL NUT INDICATORS

Indicadores de tuercas de ruedas sueltas de varios tamaños
Indicateurs d'écrou de roue desserrés multi-tailles

Cover 31 lug nut sizes from 3/4" (19 mm) to 2" (50 mm) and fit 6-, 8- and 10-sided lug nuts. Installs over a lug nut without tools – fastening securely with a ratcheting closure. Made from a durable, reusable bright yellow polymer, each HexChex has a clocking pointer to alert a driver when a lug nut is beginning to loosen. The Ken-Tool HexChex indicators will not melt under heavy braking unless a hub overheats, alerting the driver to hub problems. A melted HexChex is easily removed without damage.

Pilot Sleeve™ Truck Wheel Centering Installation Guide

PILOT SLEEVE™ 30631

Mangas de centrado de poliamida
Manchons de centrage de roue en polyamide

Polyamide Wheel Centering Sleeves. Over time, the pilots on the hub can lose tolerances originally intended from the factory, allowing an offset between the wheel and the hub bearing.

Polyamide Wheel Centering Sleeves take up the gap between the 22mm stud and the 26mm wheel opening, realigning the wheel to the TRUE CENTER of the hub bearing.
