

LT991 Hollow End Line Taps

PROBLEM: A/C and hydraulic line fitting threads become corroded over time and are damaged in disconnect process requiring complete line removal to repair.

SOLUTION: Hollow end line taps rethread female fittings without line removal. Hollow end tap slides over flared end of line easily, rethreading female connector.

Use on A/C, Brakes, Oil, Trans and heater lines and coils.

8 piece kit covers all popular sizes:

14MM 22MM
16MM 24MM
18MM 27MM
20MM 1 1/8"

A/C SERVICE

LT-860 Magnetic Rechargeable Screwdriver Holster

Holds two rechargeable screwdrivers. Conveniently store your rechargeable screwdrivers near work area at all times. Securely mounts to any metal surface. Holds up to two of any popular rechargeable screwdrivers. Readily access your rechargeable screwdrivers at any time.

LT-870 Magnetic Air Hose Holder

Holds 3/8" - 1/2" shop air hose. Attaches to any metal surface close to work area. No more air hoses on floor for car to run over. No more searching and reaching for air hose. Great aid for retractable air hoses.

LT-910 Magnetic Impact Gun Holder

The LT-910 Magnetic Impact Gun Holder gives a secure place to hold your 1/2" and smaller impact gun. Use on a tool box or other flat ferrous steel surfaces anywhere in the shop. The tubular design mounts with a 160 pound magnetic force. Move it to where you need it - always handy.

impact gun not included

IN USE

LT998 Hose Clamp

PROBLEM: Most mechanics have hose clamp removal tools. However, they don't work if they can't reach the compression tips of the hose clamp. This occurs often when the clamp is put on erratically at the factory or by another mechanic.

SOLUTION: Our hose clamp pliers reach around the hose to encapsulate the clamp compression tips. Our tool allows the mechanic to easily rotate the clamp to a position where he can now use his clamp removal tool or remove clamp using our tool.

NEW & IMPROVED HANDLE

LT865 Spark Plug Piston Lock

The LT865 is a must have tool when servicing timing belts and chains. This unique tool prevents the crankshaft from shifting when servicing belts and chains. Designed with a brass end to prevent damage to the piston. Replace one spark plug with the spark plug piston lock to lock up motor.

LT-220 Convert-A-Chuck Kit

Convert your 3/8" and 1/4" air ratchet to an angle head drill. Kit includes both the 3/8" (LT-205) and the 1/4" (LT-210) Jacobs Chucks, chuck key (LT-215) and a cordless screwdriver adapter (LT-217). Uses include: drilling, tapping, hole sawing, and stud removal in tight areas. Also available individually.
