Subject: Protect couplers from impact tool shock with a snubber hose.

Reduce premature wear and damage of couplers with a short snubber hose between the coupler and the impact tool. The hammering vibration from the impact tool will be absorbed by the snubber hose and protect the coupler against tool vibration. This device will extend the service life of the coupler significantly, improve mobility and reduce worker fatigue.

Milton offers a wide range of snubber hoses to meet most any need.

<u>Part No.</u>	<u>Hose ID</u>	<u>Length</u>	<u>360°Swvl Fitting NPT</u>	<u>Brass Fitting</u>
S 680	1/4"	30"	Male 1/4"	1/4" FNPT
S 680-1	1/4"	5'	Male 1/4"	1/4" FNPT
S 680-2	3/8"	30"	Male 1/4"	1/4" FNPT
S 680-3	3/8"	5'	Male 1/4"	1/4" FNPT
681	1/2"	2'	Male 3/8" non swivel	3/8" MNPT
681-1	1/2"	2'	Male 1/2" non swivel	1/2" MNPT

Although these may be known by various names such as "whip hose", "leader hose" or "snubber hose" they all serve the same purpose. The end result is a safer more economical assembly.
