

## Body Shop Requirements from Pulling to Painting

October 1, 2017

For Immediate Release

### MOTOR GUARD INTRODUCES LATEST STUD WELDER KIT

#### Entry-Plus Kit now Upgraded with Striker-Tip™ Draw Pins

Motor Guard is pleased to introduce a brand new enancement to their Magna-Spot™ line of Stud Welders, the JO-1050 Entry-Plus Kit with improved Striker-Tip™ Draw Pins for strong welds on all steels. Specially designed for “No-Holes” dent repair on today’s light weight, high-strenth steels, the kit contains all the basic componets of Motor Guard’s full-featured kits at an entry-level price.

The JO-1050 Stud Welder Kit incorporates Motor Guard’s exclusive Low-Heat technology, designed for today’s high-strength steel unibody vehicles. With plenty of power for any job, this welder virtually eliminates ‘burn-through’, a common problem associated with other models.

Complete with a Heavy-Duty Slide Hammer and a now with supply of 500 Stiker-Tip™ Draw Pins and a handy Storage Box, this kit contains all the basic items needed for professional no-holes dent repair. In addition, a full array of accessories is available to expand this kit for a wide variety of applications.

All Motor Guard Magna-Spot® Welders feature the exclusive Magna Pin System® (MPS®) which provides a convenient and secure holder for pins both on the case and in the electrode tip.

Motor Guard Magna-Spot Stud Welder Features:

- High Power, Low Heat Design
- Exclusive Magna Pin System® (MPS)
- Light Weight and Ergonomic
- High Heat High Impact Case
- Nine-Foot Oil Resistant Power Cord
- Heavy-Duty Twist-Lock Slide Hammer
- Full Five-Year Warranty, Made in the U.S.A.

The Motor Guard JO1050 Stud Welder Kit is part of a full line of refinishing products. From Pulling to Painting, Motor Guard Corporation has a product for all of your autobody repair and refinishing needs.
