

V5 Bleeder

BY PHOENIX

Our new V-5 Reverse Bleeder is economy designed for retail shelf space in national auto parts stores

AVAILABLE FROM
Phoenix Systems Online Site
brakebleeder.com

PRICE
Under \$65

OUR RATING

The V5 DIY has the bare necessities for world class brake and clutch bleeding at an economy price.

The V5 DIY features patented reverse bleeding technology that, combined with vacuum, bench or pressure bleeding, allows for the removal of more air than conventional brake bleeders.

Removing more trapped air is important because it:

- Creates a firm pedal
- Reduces stopping time
- Increases braking power

“With our innovative research and development, we have developed versatile tools that remove trapped air from brake and clutch systems, which is critical to achieving the perfect pedal and reducing stopping distance,”

NEW ARRIVAL:

The V5 DIY is a one man bleeder

PROS/CONS

- ▲ Designed for light duty
- ▲ Affordably priced for the enthusiast
- ▲ Still performs all bleed methods
- ▲ Same features as professional tools
- ▼ Not rebuildable

V5 DIY BLEEDER

Pro bleeding now available for the enthusiast

said Jon Petty, CEO of Phoenix Systems. “We are excited to take the patented technology that professional technicians have used for years and make it available to the enthusiast with our V5 DIY kit.”

“Bleeding brakes is a fast one-man job when you put physics to work for you”

This new V5 DIY Reverse Brake & Clutch Bleeder is more lightweight and portable than ever before. It doesn't require compressed air or electricity and is available at an affordable price so that enthusiasts everywhere can start to remove more trapped air from their brake lines than ever before.

Each V5 DIY comes with an instruction pamphlet, the V5 Reverse Bleeder, and the accessories needed to perform reverse, vacuum, bench and pressure bleeding methods.

Top 3 sellers

Get the perfect pedal...

1 MaxProHD

The best brake bleeder in the world just got better with a complete redesign. This reverse bleeder allows automotive service professionals to efficiently perform one-person brake services, including ABS.

2 V12 Professional

(Featured above)

The V12 is designed for light duty professional use and is made of Zytel nylon with metal like strength. It comes with everything to perform all bleed methods.

3 V5 DIY

The V5 DIY has the bare necessities for the world class brake and clutch bleeding at an economy price.

Reverse Bleeders

One Man. One tool. Every bleeding method known to man

Al Phoenix Bleeders are designed to perform all bleeding methods like: reverse, bench, pressure, cross and vacuum bleeding.

The Brake Bleeder REvolution. With any Phoenix Reverse Brake & Clutch Bleeder, one man can bleed the brakes on any vehicle in 10 minutes or less – even if it's a tough ABS job (you won't need a scan tool or special clips). The Phoenix Reverse Brake Bleeder is a revolutionary tool based on an incredibly obvious concept: Air wants to go up. That's it. Traditional brake bleeding tools and techniques fight this principle. At Phoenix, we harness it, so you can quickly remove all the air from the whole braking system.

ITEM 2002-B
MaxProHD Brake and Clutch
This is the toughest, longest lasting, smoothest operating Reverse Brake Bleeder we have ever made. It comes with a 2 yr warranty and works on all makes and models. Made of solid cast steel with a powder coated finish.

ITEM 6001-B
Master Cylinder Cover Kit.
These attachments make bleeding brakes a breeze. They will fit 95% of all makes and models. They are set up to work with our reverse bleeders, however we can supply an adapter that will allow you to use these with your current pressure bleeder.

ITEM 2104-B
V-5 Brake Bleeder
When you are in a pinch and need an inexpensive fix to get all that trapped air out of your brakes or clutch then the V-5 will get the job done. It includes attachments for all makes and models and is very affordable.

ITEM 3008-B
BrakeStrip Report Card
Make selling a brake fluid exchange a whole lot easier with the Report Card. After testing brake fluid with BrakeStrip you can supply your customer with proof of why they should have their brake fluid changed. Each 3008-B contains 100 Report Cards.

ITEM 2001-B
MaxProHD Secret Weapon
The Secret Weapon gives you all the awesomeness of the MaxProHD plus a BrakeFree and 100 Brake Fluid Test Strips.

ITEM 2003-B
V-12 Economy Professional
The V-12 is tough enough for everyday professional use, but is at a price anyone can afford. It is made of zytel, comes with a 1-year warranty and is fully rebuildable. Works on Brake and Clutch

ITEM 4001-B
BrakeFree
You begin by placing the appropriate socket onto the end of the BrakeFree. You then place the BrakeFree into your favorite air hammer and begin to gently vibrate the area surrounding the bleed screw or rusted bolt. After a minute or so the stuck bolt can easily be removed.

ITEM 3301-B
BrakeStrip Check
This machine is used to take the subjectivity out of a visual determination of a BrakeStrip test. Simply place test strip onto BrakeStrip Check and wait for your copper ppm level to print out of the top.

Print out makes a great conversation piece with your customer.
