**RETRACTABLE TEST LEADS REELS**

- A must for testing electrical circuits on cars, trucks, trailers, boats, equipment and more
- Easy to use - Pull out to required length. Leads will stay at desired length until rewound into protective case for storage
- 18 Gage copper wire with insulated alligator clips
- Different colored lead wires allow for easy identification when testing multiple circuits
- Specifications:
  - Maximum amperage rating is 10 amps fully unwound and 6 amps wound
  - Maximum voltage is 30 volts DC

Cat. No.	Description
22800	1 Lead x 30'
22810	2 Leads x 30'
22820	2 Leads x 30' with magnetic base
22830	3 Leads x 10'
22840	3 Leads x 10' with magnetic base

**AUTOMOTIVE TEST LEAD KIT**

**23000** - This is the ideal Test Lead Kit for your automotive electrical testing requirements. It contains all the necessary connectors and wire to use as jumper leads or to test a wide variety of automotive electrical and electronic circuits. Kit has 48" heavy duty, highly flexible test leads. Banana plugs will fit standard banana plug receptacles as found in multimeters. Stainless steel probes have 8-32 thread to accept most other female threaded test lead accessories. Supplied in a hangable plastic storage box. The kit includes:

DISPLAY PACKAGED

	QUANTITY			DESCRIPTION
	NEUTRAL	BLACK	RED	
		1	1	48" test lead with probe and banana plug
		1	1	Plunger hook clip with 8-32 female thread
		1	1	Spade connector with 8-32 female thread
		1	1	Probe insulator extension
2				Alligator clip with 8-32 female thread
		1	1	Insulator for alligator clip
		1	1	Insulated alligator clip with female banana plug connection
