## HEADLIGHT-TAILLIGHT POLISH KIT

The polish compound and foam buffing pad is designed to remove oxidation from faded headlights and taillights on cars, motorcycles, boats and aircrafts to a "like new" finish. The polish leaves a slick, protective barrier that should be applied twice a year. The microfiber cloth is used to wipe the surface clean and dry. See [www.smaroldinc.com](http://www.smaroldinc.com) for Safety Data Sheets. Not packaged for international sales.
