

BB007

Ultimate Brake Bleeder Removal Tool Kit

**SIMPLE,
SAFE
SCREW
REMOVAL**

A Completely New And Better Way To Remove Brake Bleeder Screws

Features a one-piece, compact tool that's perfect for tight spaces.

- Reduce labor time
- Avoid unnecessary and difficult drilling, tapping, or heating
- Decrease the risk of damaging the caliper
- Complete brake jobs faster and avoid delays
- Everything you need in one easy-to-use tool kit
- Pays for itself in as little as one brake job
- Works with both aluminum and cast iron calipers
- Replacement bleeder screws included

How does the BB007 work?

Installing the pin into the bleeder screw prevents the walls from collapsing. Applying shock to the bleeder for approximately three to four seconds causes the bleeder to case-harden and loosens the threads. This makes the bleeder screw easy to remove without damaging the caliper.

Easy To Use

- 1** Insert special-sized pin into the bleeder screw
- 2** Install removal tool into air chisel and shock bleeder from top
- 3** Remove bleeder screw

PART#	DESCRIPTION	QTY
BBTOOL	BB007 Tool	1
BB01	M10 x 1.0S Brake Bleeder Screw	4
BB02	3/8" – 24 NF Brake Bleeder Screw	4
