

Paintable

Corona-treated so paint will not
flake off

Excellent cling

- Tri-layer paintable sheeting is easy and fast to apply, and clings to the vehicle's body even after being repositioned
- Corona-treated so the overspray paint won't flake off and create rework
- 3-ply resin formula provides excellent tear resistance, prevents bleed through, and is solvent resistant
- Conveniently packaged on a standard core to fit all current masking dispensers, making it simple for one person to apply

Blue Sheetting

Paint will adhere to the outside layer of plastic, eliminating flake-off. The cling ensures material adheres to the area that is to be protected. Norton Blue Sheetting can be cut and painted along the critical edge.

Anchor® brand Hand Mask

IPG's Anchor® brand Hand Mask is a pre-folded, high density polyethylene masking film designed for multiple transportation applications. The thick and durable 12 micron film is corona treated to resist overspray flaking during paint applications. This special film is designed with a reinforced top edge formulated to prevent the underlying film from sticking. Solvent resistant; no bleed-through and clings to surface. Designed to work with multiple hand dispensers and the 1" core fits most masking machines.
