

***91400B UPDATED UNIVERSAL OHC VALVE SPRING COMPRESSOR** PATENT PENDING Actuate the compression tube even in tight confined locations like under the cowl where the lever cannot be moved, or may not even fit. By adding the ability to separate the lever from the compression tube anywhere along the bar, you can compress the springs that are confined by brake boosters, or other factors by locating the lever along the bar where there is open space.
Applications: All vehicles

*See Replacement Parts Page 43-44 *See Update Kit Page 31

91400B-LDT VALVE SPRING LOCK DOWN TOOL

Developed to aid the technician when using the 91400B to remove and re-install valve springs. In operation, it locks the compressor bucket down on the retainer allowing both hands free to remove and re-install the keeper.

91410B UPDATE KIT Updates 91400A to 91400B
The update kit includes: Hex bar, two hex slider blocks, three detent clevis pins and a short lever bar.

91900 RADIATOR DRAIN PLUG SOCKET Snaps onto a 3/8" square drive extension allowing it to reach into confined areas. It also features a double slotted end that captures the thumb wings to turn the drain plug open or closed.
Applications: most Import and Domestic cars.

92350 NARROW ACCESS VALVE STEM SEAL REMOVAL PLIERS Remove the valve stem seals used on most overhead camshaft engines. These pliers feature "gripping" serrations in the tip allowing them to grasp both original equipment and aftermarket seals regardless of their configuration. The pliers are made from quality heat-treated steel and come with easy grip handles.
