Removes and Installs

11400 FORD POWER STROKE 6.7L DIESEL INJECTOR SOCKETS

17mm 12-point flare nut socket and deep crows foot removes various injector lines at any angle. The injectors can be removed without breaking and damaging the plastic electrical connections. The crows foot can be spun by hand under the bent lines. The long socket has the clearance required and linear shape to properly torque the fuel lines.

11500 CAMSHAFT PULLEY HOLDING TOOL

Designed with small diameter grooved pins to allow access to small hole cam gears. The pins lock onto the cam gear allowing secure grip when tightening or loosening cam gear bolts. The wrench is a companion tool to the 96800, fitting in areas the larger version will not.
