

American Forge & Foundry offers floor jacks from 2 to 4 ton and most have the option of a 1 or 2 pc handle. They are designed with the professional service technician in mind and built to withstand the rigors of everyday use. Heavy gauge steel, double pumper technology, UV powder coat paint, upgraded seals, and an overload safety valve are just some of the features that make the AFF floor jacks among the most durable in the industry today.

Double Pump available on all models
