

Quick Score

The only portable score aid that displays both game and set scores!

To use the **Quick Score**, simply hang the unit over a net outside the doubles sideline, with each of the larger black boards on either side of the net. Then use the elastic Velcro strap to secure the unit to the net by wrapping it over the unit, through the net, and then attach the Velcro to itself on the other side.

The black elastic Velcro strap in this photo is placed vertically over the unit between the “game” numbers 3 & 4 and runs through the net before attaching to itself.
