

JAMSTANDS™

by Ultimate Support

On stage, behind the board, or in the studio, sometimes you need your rack to roll with you. The Rolling Rack Stand easily accommodates, boasting an 11U-over-8U rack on casters, two of which lock to keep your rack from rolling away. The top section is angle-adjustable for convenience, and the frame is built from rugged steel for durability.

SETUP INSTRUCTIONS — JS-SRR100

PARTS INCLUDED:

- A. (3) Cross bars
- B. (2) Side angle bars with wheels
- C. (1) Top rack
- D. (1) Allen wrench (Tool)
- E. (2) Tightening knobs
- F. (6) Large screws
- G. (6) Washers
- H. - Bag of small screws & mounting clips

1. Using large screws, washers, and allen wrench attach all three cross bars to one of the side angle bars with wheels. Make sure mounting holes are on the inside.

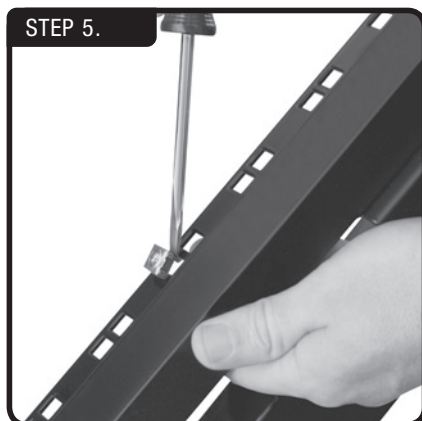

2. Line up all three cross bars with other side and hand tighten large screws with washers. After all three bars have been attached use an allen wrench to finish tightening.

3. Attach top rack to assembled rack by lining up rotating links over each other. Start with one side and snap the other into place.

4. Screw in tightening knobs to both sides. These are used to adjust top rack to desired angle.

5. Use a flat head screw driver too attach mounting brackets. Use small screws to attach equipment to mounting brackets.
