

2-WAY SATELLITE SPEAKER PAIR

Model: SAT-BK User Manual

Thank you for purchasing the Dayton Audio 2-way Satellite Speakers. These satellite speakers are great for home theater surround sound systems, or for any sound application where small size and big sound are required. Each speaker features a 3-3/4" polypropylene woofer with rubber surround for strong bass and clean midrange, and a 5/8" polycarbonate tweeter for extended highs. A highly engineered crossover ensures a smooth and even frequency response. Best of all, these speakers feature weather-resistant construction, making them even more versatile!

Connection: Use a high-quality wire to connect your speakers to your amplifier; 16 or 18 gauge is recommended. Be sure to connect all speakers with the same polarity using the red binding post as positive in all speakers.

Placement: As a front speaker in a home theater system, the speakers should be placed at close to ear height and several feet to the side of the viewing screen. The wider the listening area, the wider the speakers should be spaced. As rear speakers in a 5.1 system, the speakers should be located either directly to the side or behind the listening position, depending on room layout and preference. In any application, the strongest bass response will be achieved when the speakers are located at the union of a wall and ceiling, or in a corner location.

Specifications: • 3-3/4" polypropylene woofer with rubber surround • 5/8" polycarbonate tweeter with ferrofluid • Frequency response: 100 – 20,000 Hz • Impedance: 8 ohms • Power handling: 50 watts RMS/80 watts max • Sensitivity: 87 dB 1W/1m • Dimensions: 7-1/2" H x 4-1/2" W x 5-1/4" D.

Warranty Information

Dayton Audio products are warranted free from defects in material and workmanship for **5 years** from date of purchase. **1 year** warranty applies to the following products: powered subwoofers and electronic devices (e.g. subwoofer amplifiers, and plate amplifiers, as well as the Omnimic V2 and DATS loudspeaker testing devices). In the rare case of a product failure, please contact your place of purchase or call our Customer Support Department at (937) 743-8248.

Warranty Limitations

There are no other warranties, either expressed or implied, that extend the foregoing, and there are no warranties of merchantability or fitness for any particular purpose. Dayton Audio is not responsible for any consequential or inconsequential damage to any other unit or component or the cost for installation or extraction of any component of the audio system, or for the improper use of products. This includes but is not limited to burnt voice coils, overheating, bent frames, holes in the cone, or broken lead wires.

This warranty gives you specific legal rights and you may also have other rights that vary from state to state.

Non-Warranty Service: If non-warranty service is required, the product may be sent to the Company for repair/replacement, transportation prepaid, by calling (937) 743-8248 for details, complete instructions, and service fee charges.
