COLOR OPTIONS

Standard Upholstery Color Choices

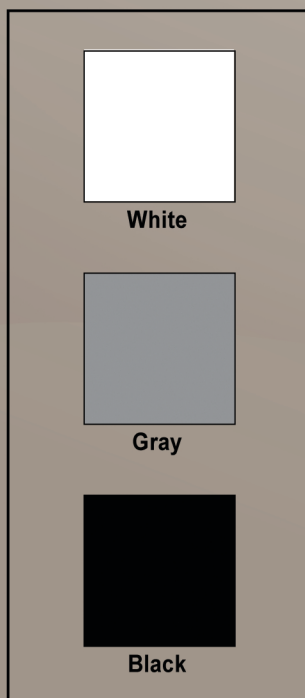

- Product pricing is reflective of standard upholstery only. Pro Maxima offers a wide variety of frame upholstery colors (not shown) available at an additional charge.
- Custom upholstery branding and bench wraps with logo also available at an additional charge.

Contact your Pro Maxima Design Professional for non-standard upholstery and frame colors and pricing.

NOTE: Actual colors may vary from the colors seen on your viewing screen or print.

Standard Frame Color Choices

Durable Powder Coat Finish

All Pro Maxima strength and conditioning equipment is protected with a custom color powder coat finish. Our 20,000 sq. ft. powder coating facility ensures that every piece of equipment manufactured goes through our 3 stage process. Our process begins with a state of the art pellet blasting (sand blasting) machine system that purifies the steel. The equipment is then sent through the paint station where the magnetic paint powder is applied. The final step is to send the equipment through our large oven which bakes/cures the powder coat creating a long lasting, hardened finish.

Pro Maxima can also finish your equipment in a variety of custom colors as well, at an additional charge. From black wrinkle finish to high gloss metallic flake finishes, we can provide your facility with the look you desire at a price you can afford. Call and speak to one of our design professionals for more details.
