## HOW TO ENSURE YOU SELECT THE CORRECT SIZED QUATRO BOOT

Quatro boots are designed to lock in the foot and therefore it's important to select the right size to ensure you get the best out of your boots.

Follow this easy-to-use guide and enjoy the comfort and performance of the next generation in professional farm boots.

1. Wearing your normal gumboot socks, trace an outline of each foot onto a sheet of paper
2. Now, measure the distance from the centre point of the back of the heel, to the tip of each foot
3. From the sizing chart, select the closest size that is greater than your largest foot measurement (i.e. if your Left foot measures 291mm and your Right foot measures 289mm, select size 12, 299mm)
