

Safe•t mate®

MODEL # SM-006

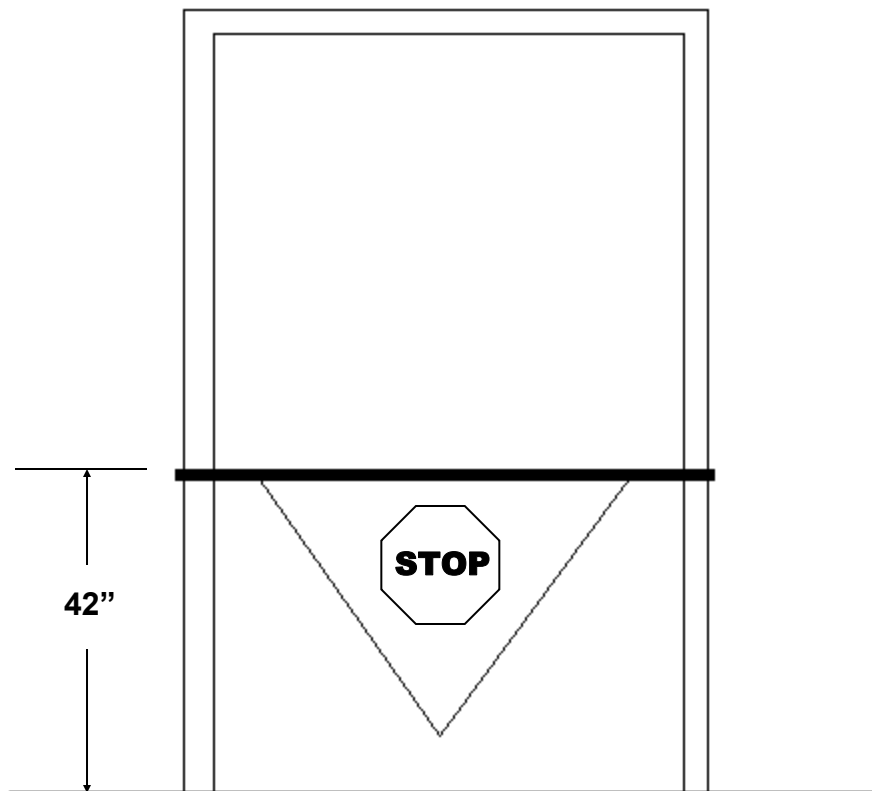

Adjustable Nylon Stop Banner

The Safe•t mate Nylon Stop Banner presents an imposing visual barrier. The recognizable red stop symbol set against the bright yellow triangular background has proven to be an effective deterrent. Installed correctly, it will prevent wandering individuals from entering restricted and dangerous areas.

Suggested uses: Stairwells, wet floors, Nurses stations, resident rooms, utility rooms, areas under renovations etc.

One banner is adjustable to span up to a 60" wide opening. Two or more can be easily joined to span wider openings.

Install the banner at approximately 42" from the floor using the provided adhesive backed hook and loop. Grommets are installed on the straps so that **ONE** side of the banner can be more permanently installed. This may deter individuals from removing and walking away with the banner.

Care Instructions The banner and straps are machine washable. **DO NOT PUT IN DRYER.** Line dry. To press, place cloth between banner and **low heat** iron.
