

Ukulele Capo

GA200 / 10152

Features and Benefits

Have you ever felt your uke was just pitched too low? No problem. Simply clamp on the GA200 quick change ukulele capo and play in any key you want. The GA200 works just like a full size spring-loaded capo but is sized for mandolins and ukuleles (soprano, concert, tenor, and baritone). Diecast zinc alloy provides the necessary rigidity, while silicone padding provides uniform pressure and protects the neck / fingerboard.
