

Wire Folk Instrument Stand

GS5000 / 10588

Features and Benefits

The GS5000 Wire Folk Instrument Stand is sized just right for ukulele, violin, viola, mandolin, lap steel guitar, dulcimer, and similar instruments. Every bit as portable as the instruments it's designed to hold, the GS5000 is lightweight and unobtrusive. But don't let its size fool you; constructed of 7mm steel wire, the GS5000 is as tough as most full size stands. A stepped yoke design is what allows the GS5000 to accommodate so many types of instruments.
