KS6150 / 12509

Features and Benefits

Our Compact MIDI/Synthesizer Utility Stand is a low-profile pedestal-style stand that provides electronic musicians with convenient access to mini synths, MIDI controllers, samplers, mixers, and other devices. The height adjusts for use while standing or sitting and its heavy-duty platform adjusts in width to accommodate your application. The platform also tilts up to 15° for the user to dial in optimal viewing angle and comfort. A wide, solid base provides exceptional stability while non-slip rubber feet prevent unwanted movement.
