

Mobile Equipment Stand

MIX-400v2 / 14441

Features and Benefits

Our MIX-400v2 Mobile Equipment Stand provides sturdy, easy-to-move access to mixing or performance gear. The side rails and front bumper adjust to hold equipment of various sizes firmly in place. Adjustable height and tilt angle enable positioning of the device for comfortable operation. Heavy-duty construction and five base legs deliver balance and stability to reliably support gear. For ease of movement and precise placement, the base rolls on casters that can lock for stationary use. To simplify storage and transportation, the stand disassembles into three pieces.

Specifications

- Weight Capacity: 88 lb
- Height Adjustment: 28"-38"
- Platform Length Adjustment: 12"-15.5"
- Platform Width Adjustment: 14.5"-21.5"
- Base Spread: 23"
