

GreyWolf™ Skid Steer Stump Bucket Plate

Stump
Bucket
PN: 1062

APPLICATIONS INCLUDE

Skid Steers

Plate mounts easily to skid steers that use the standard universal quick attachment.

Plate constructed of **5/16" thick steel** with gray powder coat finish

Serrated edges on side for cutting roots

PERFECT FOR EQUIPMENT THAT USES THE SKID STEER QUICK ATTACHMENT STYLE.

The GreyWolf™ Skid Steer Stump Bucket is constructed from 5/16" thick steel. Mounts to skid steer loaders that use the standard universal quick attachment to easily dig out stubborn rocks and stumps using the power and torque of your skid steer to make your DIY job faster and easier!

Features:

- Heavy-duty construction
- 49" x 19" x 42" (W x H x L)
- Reach far under stumps to tear out roots using serrated edges on the side of the bucket
- Can also be used to pry up old fence posts, remove sidewalks and asphalt, and dig up ditches and swales
