

### MOISTURE WICKING

All *drirelease* fabrics utilize hydrophobic and hydrophilic fibers to pull moisture away from the skin – fast.

### FAST DRYING

In test after test, *drirelease* fabrics reach one of the industry's highest standards for dryness – up to four times faster than cotton.

### PERMANENT PERFORMANCE

With no chemicals or irritants to wash out over time, *drirelease* ensures eco-friendly, long-term fabric performance.

### ODOR CONTROL

FreshGuard prevents odors by mitigating the development of foul smells from microorganisms so they do not cling to *drirelease* fabrics.

### SUPERIOR COMFORT

Our fabrics' soft, natural feel keep wearers dry and comfortable — regulating body temperature by keeping skin up to 7°F cooler.

### PREMIUM QUALITY

Our wide array of fabrics and knits exhibit excellent hand, hold their shape, and are easy care. They resist pilling, wrinkling and static cling.

# drirelease<sup>®</sup> fabric technology

---

## **WHAT IS drirelease<sup>®</sup>?**

drirelease fabrics offer a patented blend of 85-90% synthetic, hydrophobic (water repelling) fibers and 10-15% natural, hydrophilic (water absorbing) fibers. The built-in combination efficiently pulls moisture and perspiration away from the skin and pushes it to the exterior of the fabric where it can evaporate quickly.

## **THE BENEFITS OF FRESHGUARD**

drirelease and our eco-friendly FreshGuard<sup>®</sup> work together in minimizing odor creation. Neither an antimicrobial nor an antibacterial (both of which attack bacteria), FreshGuard helps prevent bacterial odors from growing.

## **RELEASE PERFORMANCE**

Fabrics utilizing our engineered blends provide superior wicking, faster drying and greater overall peak performance when compared to other technologies on the market.
