

Macro-Zyme™ Pond Bacteria

The **Green** Approach to Cleaning up your Pond

- **Removes pond scum and odors:** Eliminates fish wastes and ammonia. Digests organic compounds and assists in the breakdown of goose/duck excrement. Rapidly removes dead grass, leaves, and paper.
- **Reduce Excess:** Removes nutrients and sediments without chemicals. Decreases Nitrite and Nitrate, and reduces phosphate (which is typically the limiting nutrient for plant growth).
- **Safe and Non Toxic:** Non pathogenic/ non toxic to human, fish, wildlife, and livestock. It is safe for irrigation ponds and no permit is required.
- **Better water clarity:** Clears water and helps restore a healthy oxygen level while also reducing oxygen demand.
- **Product extras:** Dry pack means no extra weight when shipping. No "stinky" smells from the product itself.
- **Easy to use:** Just toss the water soluble bags or apply the bulk product at the recommended rates. Shelf life of at least two years.

8oz water soluble bags

Jar of 6pk of 1oz bags

25# or 50# bulk pail

There are a plethora of manufacturers all suggesting that their bacteria and enzyme products are the best. We have experience with this product in real world applications.

"We had treated this pond every 2 weeks with chemicals for filamentous algae for 7 years. Two years ago we made the switch to the Macro-Zyme treatment instead of chemicals and it has had phenomenal results. I haven't had to put the boat in the water to spray this pond for 2 years now. I can apply the macro-zyme from the shore and it keeps the pond clean and reduces labor costs and time drastically. We are starting our 3rd year of Macro-Zyme in this pond without a drop of chemicals used."

– Chris Railing, Future Horizons, Inc.

Make Your Pond Sparkle and Leave Pond Maintenance to Other Pond Owners.

Macro-Zyme's unique blend is the pond professional's choice for building and maintaining a healthy pond, water garden, and bio-filter. Used by professionals since 1991, this professional grade formula of highly concentrated blend of natural occurring bacteria and enzymes rapidly biodegrade top and bottom sludge while reducing components that contribute to sludge build up in ponds of all sizes.

Part #	Description	Ship Wt.	Dosage
MZ1	6pk 1 oz ws bags	1	1 oz treats up to 1000 gallons
MZ1C	Case of 6 - 6pks of 1 oz ws bags	3	case of 6 treats up to 6000 gallons
MZ8	8 oz ws bags	1	8 oz bag treats 1/2 acre ft.
MZ8C	Case of 40 - 8 oz ws bags	22	Case of 40 treats 20 acre ft
MZ25	25# bulk pail, no ws bags	26	25# bulk treats 25 acre ft.
MZ50	50# bulk pail, no ws bags	55	50# bulk treats 50 acre ft.

Calculations:

- Length (ft) x Width (ft) x average depth (ft) x 7.48 = total gallons
- One acre-foot (43,560 cubic feet) is the volume of water sufficient to cover an acre of land to a depth of 1 foot which is = 325,851 gallons
