Double Mag™ Readers by Bouton® Optical

Standard safety readers provide workers the needed magnification while reading or performing detail work while looking down. Several workers need that same magnification while looking up and down.

Double Mag™ Readers feature magnifiers at both the top and bottom of the lens providing magnification right where it's needed without sacrificing protection. Carefully designed to ensure that the magnifiers are positioned properly, our Double Mag™ Readers provide workers with the best natural reading positions while reducing lens distortion and eye strain whether you're looking up or down.

THE RIGHT FIT & MAGNIFICATION THAT YOUR WORKERS NEED

APPLICATIONS

- Repair Technicians
- Electricians
- Assembly Line Workers
- Tool Operators
- Mechanics
- Plumbers
- Painters

FEATURES

- Top and bottom readers for viewing detail work below or above
- 30mm wide magnifiers allow for distance viewing from the center of the lens
- Durable nylon frame with extra wide latex-free rubber nose pads for enhanced comfort
- Temples with soft rubber pads provide a secure fit
- Lightweight and semi-rimless design for comfort and all day wear
- Anti-Fog coating standard on all models
- Universal size fits most workers
- 8 base curve wrap-around lens

When safety eyewear is not worn properly or not worn at all, the risk of injury increases significantly. Workers who need readers face a unique challenge. However, they do not have to choose between safety and vision clarity. Bouton® Optical Double Mag™ Readers have both top and bottom magnification that is positioned right where it's needed so workers can more efficiently perform their jobs without sacrificing protection. **Bouton® Optical: safety glasses workers want to wear.**
